

January 30, 2017 - Alachua County Sheriff's Department Aviation Unit becomes the first Aviation Law Enforcement Agency in the Southeastern Region to purchase and install the award winning L3 Lynx NGT-9000+ multi-link transponder for their Bell 206. The Lynx product line offers a single-unit Mode S Extended Squitter transponder with traffic, WAAS/GPS, datalink weather, and a color touchscreen display. That means full FAA mandate ADS-B compliance, and a whole lot more, for less than you might expect.

Please visit our website at www.l-3lynx.com for your one-for-all, all-for-one ADS-B solution. This website also provides a free hands on simulator under the "experience" drop down tab. This allows anyone to experience our award winning Lynx device from the convenience of your own home.
