

Colombia National Police Selects Aerocomputers Tactical Map System

TRACE Worldwide Corporation is pleased to announce that the CNPD has selected the UC6000 Tactical Mapping System from Aerocomputers Incorporated for their recently purchased Bell 407GX patrol helicopter.

Featuring the functionality of AeroComputers UltiChart™ combined with UC3D video overlay and a digital video recorder all in one compact package, the new UC-6000 single box solution and operating system features all new industry-best targeting with smart search and much more.

Proven in the field by over 250 agencies worldwide, AeroComputers' digital mission management and tactical mapping systems are the industry standard for managing tactical operations in public use aircraft.

Aerocomputers products are distributed in Colombia by TRACE Worldwide Corporation.
