Axnes Aviation Establishes New U.S. Subsidiary - Axnes Inc.

February 29, 2016 - Monument, CO

Axnes Aviation AS (Norway), producer of advanced wireless communications systems for aircraft, ground, and marine applications, is pleased to announce the expansion of their company into the North American market with the creation of a new U.S. subsidiary based in Colorado, Axnes, Inc. The Managing Director for the new U.S. subsidiary is Brett Gardner, an experienced aviation industry veteran. Trygve Gustavsen, CEO of Axnes Aviation, commented, "We are very happy to have Brett on board as he brings over 25 years of valuable aviation OEM and after-market support knowledge and expertise to our new North American operation."

Axnes is attending the 2016 Heli-Expo in Louisville, KY, March 1-3. Please stop by their booth (#1001) on March 2 from 1-4PM to join the Axnes team for a cold beer and to learn more about their advanced wireless products.

About Axnes

Axnes Aviation develops and supplies advanced and highly durable wireless intercom solutions for use under harsh conditions on aircraft and other demanding applications. Axnes is well known for its successful wireless ICS solutions and today more than 750 aircraft worldwide are equipped with their wireless technology.

The company has been supplying its wireless intercom systems for almost two decades and is an EASA Part 21 and Part 145 approved organization. Axnes is an approved supplier to OEMs such as AgustaWestland, Airbus Helicopters, Bell Helicopter and Sikorsky. Axnes

Aviation AS was founded in 1995 and is a 100% privately owned company with its main office located in Grimstad, Norway.
