

European Operator Habock Aviation Group to convert their fleet and order thirty PA100 *PUREair* Systems

Louisville, KY, March 2, 2016 – DART Aerospace and its European partner Heliswiss Ibérica successfully signed contract at Heli-Expo 2016. After multiple tests with various air filtration solutions on the market, Habock Aviation Group selected the PA100 *PUREair* System. Consistent engine protection in harsh environments faced during firefighting and mountain rescue operations was a significant factor for the PA100 *PUREair* System to win over the competition. The improved FOD screen protection provided with the PA100 *PUREair* System prevents potential costly engine damages and is highly anticipated by Habock Aviation Group’s maintenance team. The completion will be performed by Coyotair S.A. on both the Airbus AS350 and H130 helicopters.

Jorge Verdú, CEO Habock Aviation Group: *“The PA100 is the best engine protection system. It offers superior protection and it is literally maintenance free.”*

The PA100 *PUREair* System, co-developed by Pall Aerospace and DART Aerospace, is a totally redesigned, reengineered, and retested air protection system that is virtually self-cleaning and maintenance free unlike other barrier type air filtration systems qualified for these aircraft. The 4th generation PA100 *PUREair* System leverages the latest advances in Pall Aerospace technology, including 3D Computational Fluid Dynamics, optimized system design and innovative nano-material technologies to achieve optimal engine protection for harsh operating environments.

ABOUT DART AEROSPACE

DART Aerospace is “Mission Ready”. A privately held aerospace company, we provide industry-leading design, manufacturing and market-certified solutions for the helicopter and aerospace industry. With an impressive line-up of over 700 STC’s and 5,000 products, DART offers a comprehensive portfolio of: aftermarket products, accessories, spare parts and tools for civil and military operators, all major rotorcraft OEMs, completion centers and MR&O facilities. DART’s key products include: flotation systems, landing gears, interior and exterior accessories, cargo expansion, external loads, cable cutters and filters. All this, in addition to extensive engineering capabilities and manufacturing centers delivering fast time-to-market solutions with superior customer support in over 120 countries worldwide.

ABOUT PALL CORPORATION

Pall Corporation is a filtration, separation and purification leader providing solutions to meet the critical fluid management needs of customers across the broad spectrum of life sciences and industrial manufacturing. Pall works with customers to advance health, safety and environmentally responsible technologies. The Company’s engineered products enable process and product innovation and minimize emissions and waste. Pall Corporation serves customers worldwide.
