Seeker Aircraft to Demo at SUN 'n FUN, Lakeland

(Albuquerque, NM) The Seeker, a versatile, one-of-a-kind, light observation aircraft specifically designed for surveillance missions and recently brought to market in the U.S., will be available for flight demonstrations at the SUN 'n FUN Airshow in Lakeland, FL from April 5-10th.

The Seeker, previously manufactured in Australia only, will also be built and serviced in the U.S. following a recent partnership agreement formed with Portland, Oregon's Erickson Manufacturing. Propel Aviation Sales and Services of Miami, Florida will serve as the company's southeastern dealership.

The Seeker is a two-seat, fixed-wing aircraft that delivers unmatched forward visibility, seven-hour aloft endurance and incredible affordability. Designed to address the explicit needs of a broad, rapidly growing but under-served surveillance market, the Seeker is already operating military missions in the Middle East, law enforcement missions in the U.S., and wildlife management operations in Africa, among others. It is also being used for a variety of commercial applications in Australia.

Not only does the Seeker provide superior fields of vision, but it also has the ability to carry a wide variety of sensors and cameras, and has the capability of stable and slow flight. The Seeker is unrivaled by other fixed-wing aircraft and is superior in cost and capability to many police helicopters.

Pilots or other individuals representing law enforcement agencies, oil and gas companies, or any other entity employing or in need of mission-specific surveillance aircraft, are encouraged to schedule their flight demonstration at SUN 'n FUN by contacting Rene "Frenchy" Martinez at (719) 352-9785 or martinez@seekeraircraft.com or Jimmy Lockhart with Propel Aviation at (305) 490-9330. Demonstration flights can also be requested online at <http://www.seekeraircraft.com/demo-flight-at-sun-n-fun.html>.

About Seeker Aircraft

The Seeker is a versatile, one-of-a-kind, light observation aircraft that was specifically designed and developed for surveillance missions. This fixed-wing aircraft provides a cost-effective solution for missions requiring short take-off and landing capabilities, easy maintenance in the field, and excellent cockpit visibility. Seekers are currently flying missions in Australia, Jordan, Azerbaijan, South Africa, Tanzania, UAE, and the US with the New Mexico State Police, among others. In development since 1993, Seeker Aircraft, Inc. manufactures, distributes, and supports the Seeker worldwide. Seeker is headquartered in Albuquerque, New Mexico. For more information, go to www.seekeraircraft.com.

Reporter's Note: Journalists and photojournalists covering relevant topics are also encouraged to schedule a demonstration flight.
